Beaver Code	Chain Size & Description	Lashing Capacity kg
344208	7-8mm c/w winged eye grab hooks*	3800
344210	10mm c/w winged eye grab hooks*	6000

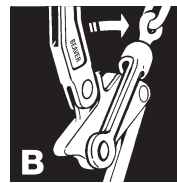

The Safety Release Handle makes this Loadbinder less dangerous than other lever style loadbinders on the market to day.

The loadbinder design allows the user to release the loadbinder tension without any recoil of the handle, typical of a lever style loadbinder. The centre body of the loadbinder independently rotates, free of the handle to release the tension smoothly and easily. This reduces the chance for injury from the handle swinging with substantial force when released.

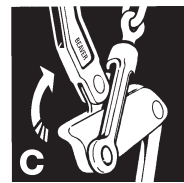

Unique Cam Movement

The handle of the BX600 moves freely to the beginning of the release point.

The body cam centre begins to rotate independently of the handle at this stage.

As the chain tension is released, the handle will remain almost in the same position.

Beaver
Grade 70 Double Swivel
Lever Loadbinders (Forged)
Yellow Painted Finish - to AS/NZS 4344-2001

Beaver Code	Chain Size & Description	Lashing Capacity kg
345006A	6mm c/w winged eye grab hooks*	2300
